

RESEARCH FOCUS	AI in Healthcare, Representation Learning, Interpretability, Medical Imaging	
CONTACT	taehyo97@gmail.com 917-815-6831	New York, NY
EDUCATION	New York University, New York, NY	
	Ph.D. in Biostatistics (Committee: Hai Shu, Yang Feng, Wen Zhou)	Expected Spring 2027
	M.S. in Computer Science	2022
	University of Toronto, Toronto, ON	
PROFESSIONAL EXPERIENCE	B.A.Sc in Computer Engineering, Biomedical Engineering minor	2020
	Machine Learning Research Intern	Summer 2026
	Dandy	New York, NY
	Developed quality models for crown generation that increased the unguided manufacturing rate from 36% to 66%, while accelerating training by 4X by learning a compact 2D latent representation of 3D geometry.	
	Statistical Machine Learning Researcher	Sept 2020 - present
	Hai Shu Lab, NYU School of Global Public Health	New York, NY
	- Thesis title: Advancing statistical machine learning for Alzheimer’s disease research - Designed computationally efficient, spatial false discovery rate control methods for high dimensional neuroimaging, adapting unsupervised W-Net and hidden Markov random fields. - Formulated an L0 penalized sparse canonical correlation analysis method for interpretable multi-modal representation learning with application to imaging-omics data. - Proposed knowledge augmented, interpretable survival modeling framework utilizing LLMs.	
	FDA-OCE-ASA Oncology Educational Fellow	Oct 2025 - May 2026
	U.S. Food and Drug Administration (FDA)	Remote
	Developed expertise in drug development, targeting regulatory policy and clinical trial design.	
	Deep Learning Researcher	Sept 2024 - May 2026
	Biofeedback Intervention Technology for Speech Lab, NYU Steinhardt	New York, NY
	- Presented the first self-supervised learning framework that focuses on within-rhotic articulatory structure in American English from lingual ultrasound video of children with residual SSD. - Integrated speaker-adversarial training that outperforms BYOL, VideoMAE, and RESA by 8% accuracy and 0.194 MCC on within-phoneme structure classification.	
	Statistical Fellow	Summer 2024
	Biostatistical Collaboration and Consultation Core, NYU GPH	New York, NY
	Consulted clients to define statistical analysis plans and supported manuscript development.	
	Software Developer Intern	May 2018 - May 2019
	Seiko Epson	Markham, ON
	- Developed object tracking ground truth generation system by calibrating OptiTrack Motion Capture and Unity3D in real time. - Implemented the Windows Software Development Kit (SDK) supporting Epson’s augmented reality smart-glasses.	
SKILLS	Programming: Python, PyTorch/JAX/Tensorflow, C/C++/C#, R, SQL, Java	
	MLOps: MLflow, Flyte, Vertex AI, Spark, Docker, Kubernetes, Git, BigQuery, LangChain

MEMBERSHIP AND AFFILIATIONS	Member, American Statistical Association	2022 - present
	Member, Eastern North American Region of the International Biometric Society	2022 - present
	Member, Korean International Statistical Society	2024 - present
	Reviewer, Medical Image Analysis	September 2026
	Reviewer, Computational Statistics & Data Analysis	August 2026
	Reviewer, IEEE International Conference on Data Mining (ICDM)	July 2026
	Reviewer, International Conference on Medical Image Computing and Computer-Assisted Intervention (MICCAI)	Mar 2026
	Reviewer, The American Statistician	Dec 2025
	Reviewer, The American Statistician	Aug 2025
AWARDS	FDA-OCE-ASA Oncology Educational Fellowship, FDA	2026
	JSM Student Paper Award, ASA Statistics in Imaging	2024
	DataFest Finalist, ENAR	2024
	Student Travel Award, American Statistical Association	2024
	PhD Fellowship Award, New York University	2022
	Certificate for Artificial Intelligence Engineering, University of Toronto	2020
	International Summer Research Award, University of Toronto	2019
	Gold Award, The Duke of Edinburgh's Award	2015
CONFERENCE PRESENTATION	"A False Discovery Rate Control Method Using a Fully Connected Hidden Markov Random Field for Neuroimaging Data"	
	Invited Oral, ASA SLDS, Brooklyn, NY	November 2026
	"Self-Supervised Learning on Lingual Ultrasound Video Encodes Clinically Meaningful Articulatory Structure of Rhotic Production in Residual Speech Sound Disorder"	
	Poster, MICCAI, Strasbourg, France	September 2026
	"A Global Understanding of Work Enjoyment and Human Wellbeing"	
	Poster, Joint Statistical Meetings, Nashville, TN	August 2025
	"Causal Determinants of Blood Pressure Control among US Adults with Hypertension: A Data Driven Causal Graphical Learning, NHANES 2013 to 2023"	
	Poster, ENAR Spring Meeting, New Orleans, LA	March 2025
	"DeepFDR: A Deep Learning-based False Discovery Rate Control Method for Neuroimaging Data"	
	Oral, Joint Statistical Meetings, Portland, OR	August 2024
TEACHING EXPERIENCE	"DeepFDR: A Deep Learning-based False Discovery Rate Control Method for Neuroimaging Data"	
	Poster, International Conference in Artificial Intelligence and Statistics, Valencia, Spain	May 2024
	"Enhancing AI-based Speech Therapy through Acoustic to Articulatory Mapping"	
	Poster, AI Research Symposium: Bridging AI Innovation and Societal Impact	
	New York, NY	April 2024
	"Machine Learning-driven Risk Factor Identification on Post-2013 Blood Pressure Control Decline in Hypertensive Populations"	
	Oral, ENAR Spring Meeting, Baltimore, MD	March 2024
	Teaching Assistant , New York University, New York, NY	
	Statistical Methods in Genomics and Bioinformatics (GPH-GU 2378)	Spring 2026

Survey Design, Analysis, and Reporting (GPH-GU 2387)	Fall 2025
Applied Bayesian Analysis in Public Health (GPH-GU 2272/3372)	Fall 2024
Applied Survival Analysis (GPH-GU 2368/3368)	Spring 2024
Statistical Inference (GPH-GU 3225)	Fall 2023
Graduate Student Mentor , New York University, New York, NY	
Pathways into Quantitative Aging Research Summer Program	Summer 2024
Pathways into Quantitative Aging Research Summer Program	Summer 2022
