

RESEARCH FOCUS	Intersection of AI and statistics across Representation Learning, LLMs, and Interpretability	
EDUCATION	New York University , New York, NY	
	Ph.D. in Biostatistics (Committee: Hai Shu, Yang Feng, Wen Zhou)	Expected Spring 2027
	M.S. in Computer Science	2022
	University of Toronto , Toronto, ON	
	B.A.Sc in Computer Engineering, Biomedical Engineering minor	2020
	Relevant Courses: Deep Learning, Computer Vision, Natural Language Processing, Statistical Inference, Causal Inference, Bayesian Analysis, Genomics/Bioinformatics, Survival Analysis	
SKILLS	Programming: Python, PyTorch/JAX/Tensorflow, C/C++/C#, R, SQL MLOps: MLflow, Flyte, Vertex AI, Spark, Docker, Kubernetes, Git, BigQuery, LangChain, LLM/RAG	
PROFESSIONAL EXPERIENCE	Machine Learning Research Intern	Summer 2026
	Dandy	New York, NY
	- Proposed a preference learning framework for 3D dental crown quality using VAE and Bradley Terry ranking head, improving the unguided manufacturing rate from 36% to 66%. - Represented 3D data in a topology preserving 2D latent space, accelerating training by 4×.	
	FDA-OCE-ASA Oncology Educational Fellow	Oct 2025 – May 2026
	FDA	Remote
	Evaluated oncology clinical trial evidence and regulatory decision-making through FDA-led case studies and a mock Oncologic Drugs Advisory Committee.	
	Statistical Machine Learning Researcher	Sept 2020 – present
	Hai Shu Lab, New York University	New York, NY
	Developed methods for representation learning, inference, and biomedical LLM applications.	
	Software Developer Intern	May 2018 – May 2019
	Seiko Epson	Markham, ON
	Implemented object tracking ground truth generation system via OptiTrack Motion Capture and Unity3D calibration, and released the Windows SDK for Epson's augmented reality glasses.
